ROLL NO : 2303A52111

Lab 14: Web Design Application – AI-Assisted HTML/CSS/JS Generation

Task 1 – Portfolio Website Design

You are building a personal portfolio website to showcase your

work.

Requirements:

• Create sections for About Me, Projects, and Contact.

• Use AI to:

o Suggest color palettes and typography.

o Create a responsive layout with Grid/Flexbox.

o Add smooth scrolling navigation.

Lab_14.1.html > html

```html
#Task - 1
#Create a responsive personal portfolio website using HTML, CSS, and JavaScript. The website should include three sections: About
<!DOCTYPE html>

Task 2 – Online Store Product Page

Design a product display page for an online store.

Requirements:

• Display product image, title, price, and "Add to Cart" button.

• Use AI to:

o Style with BEM methodology.

o Make layout responsive.

o Add hover effects and "Add to Cart" alert.

Lab_14.1 > Lab_14.1_2.html > html > head > style > .product-card__button:hover

```html
#Task - 2
#Create a responsive product page for an online store using HTML, CSS, and JavaScript. Display a product image, product title, price, description, and an 'Add to Cart' button. Style the page using the BEM (Block Element Modifier) CSS methodology. Make the layout responsive for mobile and desktop. Add hover effects to the product card and button. When the user clicks 'Add to Cart', show a JavaScript alert confirming the product was added to the cart.
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>Product Page</title>
    <style>
        /* BEM CSS Methodology */
        .product-card {
            background-color: #fff;
            border-radius: 8px;
            box-shadow: 0 4px 8px rgba(0, 0, 0, 0.1);
            max-width: 400px;
            margin: auto;
            padding: 20px;
            text-align: center;
        }

        .product-card__image {
            width: 100%;
            border-radius: 8px;
        }

        .product-card__title {
            font-size: 1.5rem;
            margin: 15px 0;
        }

        .product-card__price {
            font-size: 1.25rem;
            color: #4A90E2;
            margin-bottom: 15px;
```

Lab_14.1 > Lab_14.1_2.html > html > head > style > .product-card__button:hover

```html
<html lang="en">
<head>
    <style>
        .product-card__button {
        }

        .product-card__button:hover {
            background-color: #D0021B;
        }

        /* Responsive layout */
        @media (max-width: 600px) {
            .product-card {

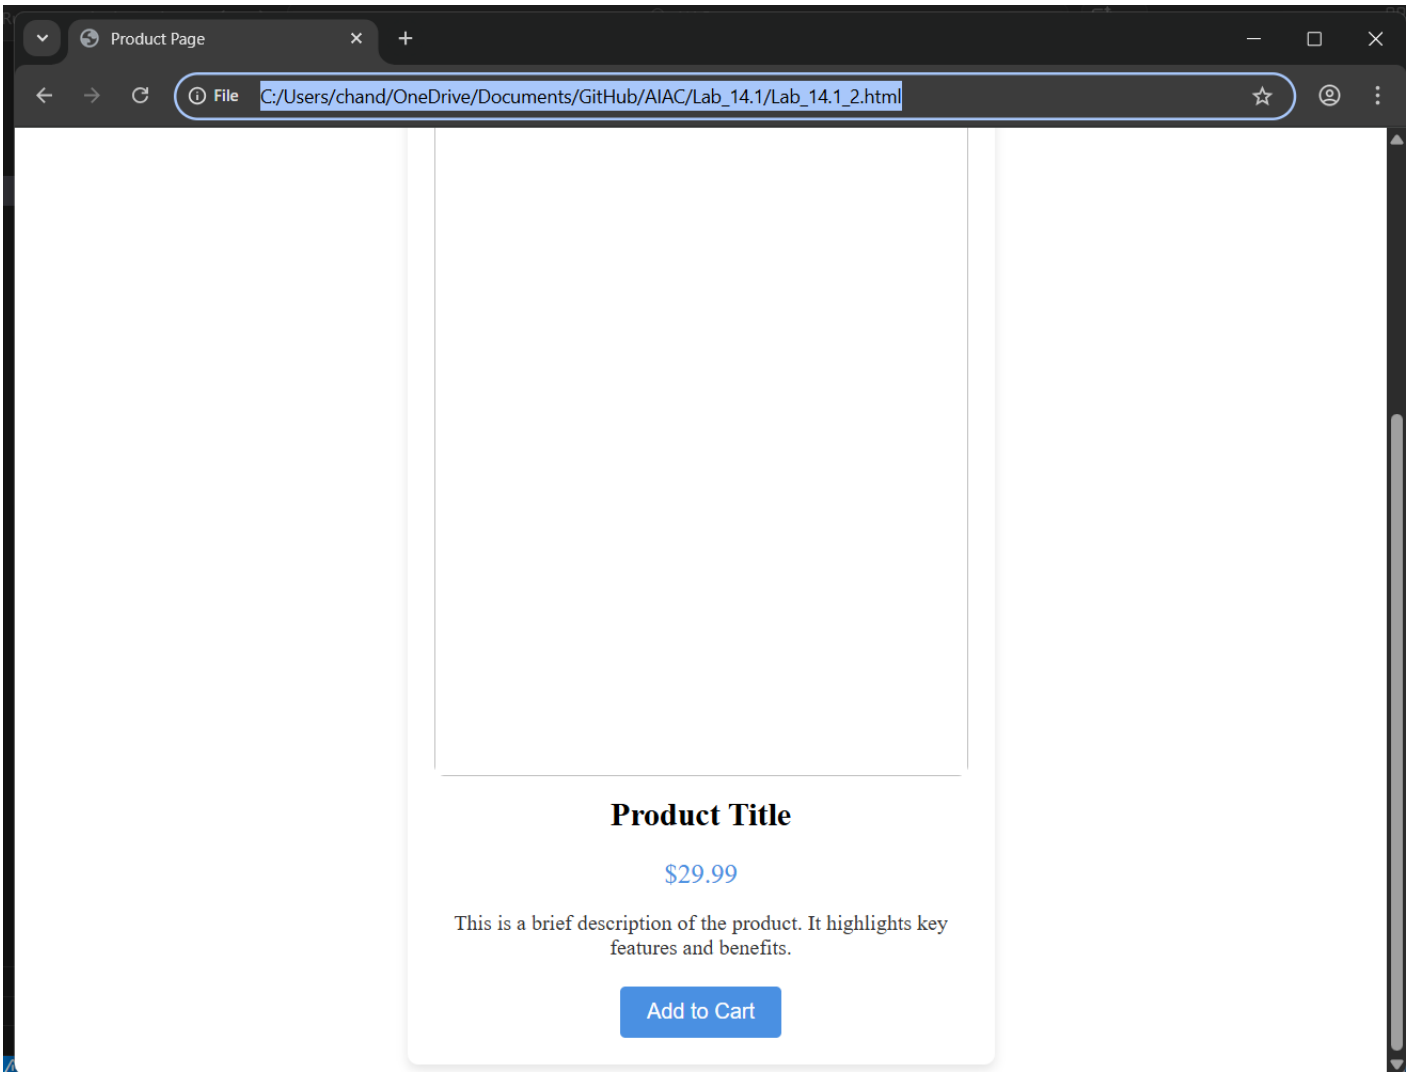
        <button class="product-card__button" onclick="addToCart()">Add to Cart</button>
    </div>

    <script>
        function addToCart() {
            alert('Product added to cart!');
        }
    </script>
</body>
</html>
```



Task 3 – Event Registration Form

Build an event registration form for a conference.

Requirements:

• Collect name, email, phone number, and session selection.

• Use AI to:

o Add form validation with JavaScript.

o Make the form accessible with labels and ARIA.

o Style with a professional look.

Lab_14.1 > Lab_14.1_3.html > html > head > style > body

```html
#Task - 3
#Create an event registration form using HTML, CSS, and JavaScript. The form should collect name, email, phone number, and
session selection using a dropdown menu. Add JavaScript form validation to check required fields, email format, and phone number
 length. Ensure accessibility by using proper labels and ARIA attributes. Style the form with a clean and professional design
 suitable for a conference website. Make the form responsive.
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>Event Registration</title>
    <style>
        /* Clean and professional design */
        body {
            font-family: 'Arial', sans-serif;
            background-color: #f5f5f5;
            color: #333;
            margin: 0;
            padding: 20px;
        }

        .form-container {
            max-width: 600px;
            margin: auto;
            background-color: #fff;
            padding: 20px;
            border-radius: 8px;
            box-shadow: 0 4px 8px rgba(0, 0, 0, 0.1);
        }

        label {
            display: block;
            margin-bottom: 5px;
            font-weight: bold;
        }

        input, select {
```

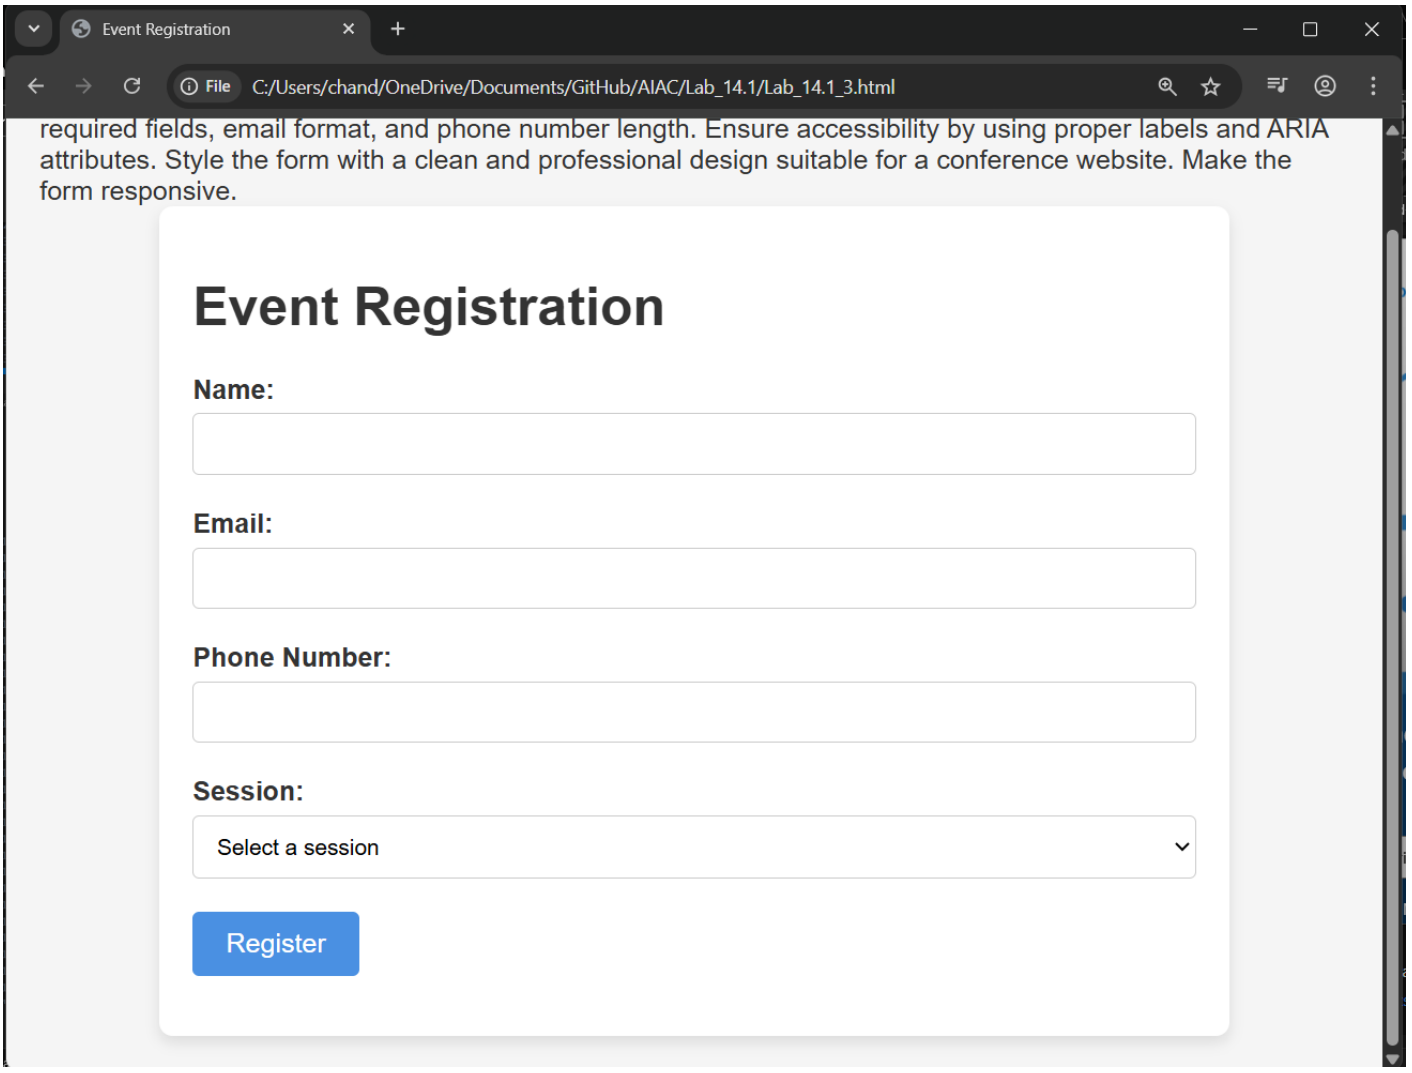
Lab_14.1 > Lab_14.1_3.html > html > head > style > body

```html
<html lang="en">
<body>
    <script>
        document.getElementById('registrationForm').addEventListener('submit', function(event) {
            event.preventDefault();

            // Get form values
            const name = document.getElementById('name').value.trim();
            const email = document.getElementById('email').value.trim();
            const phone = document.getElementById('phone').value.trim();
            const session = document.getElementById('session').value;

            // Simple validation
            if (!name || !email || !phone || !session) {
                alert('Please fill in all required fields.');
                return;
            }

            // Email format validation
            const emailRegex = /^[^\s@]+@[^\s@]+\.[^\s@]+$/;
            if (!emailRegex.test(email)) {
                alert('Please enter a valid email address.');
                return;
            }
            // Phone number length validation (assuming 10 digits)
            const phoneDigits = phone.replace(/\D/g, ''); // Remove non-digit characters
            if (phoneDigits.length !== 10) {
                alert('Please enter a valid phone number with 10 digits.');
                return;
            }
            // If validation passes, submit the form (you can replace this with an actual submission)
            alert('Registration successful!');
        });
    </script>
</body>
</html>
```



Task 4 – Resume Website

Build a one-page online resume.

Requirements:

• Sections: Profile Summary, Skills, Education, Experience.

• Use AI to:

o Propose professional typography styles.

o Align sections using CSS Grid.

o Add smooth scroll navigation between sections.

Lab_14.1 > Lab_14.1_4.html > ...

```html
#Task - 4
#Create a one-page resume with Profile, Skills, Education, and Experience. Use CSS Grid, professional fonts,
 and smooth scrolling navigation.
<!DOCTYPE html>
